

IIF Delhi Chapter & IIF Northern Region Organised a Successful Industrial Work Visit to Revent Metalcast Limited, Bhiwadi & Ratan Engineering Company Private Limited, Bhiwadi.

The Institute of Indian Foundrymen (IIF) – Northern Region, in joint association with the IIF Delhi Chapter, successfully organised a highly informative and impactful Industrial Work Visit to **Revent Metalcast Limited and Ratan Engineering Company Private Limited, Bhiwadi, on 9th December 2025**. The visit was conducted as part of IIF's continuous efforts to strengthen industry–institute interaction and to provide practical exposure to members through on-site learning experiences.

The programme offered participants a valuable opportunity to closely observe **modern foundry operations, advanced manufacturing practices, quality assurance systems, and workplace safety standards**. Both Revent Metalcast Limited and Ratan Engineering Company Pvt. Ltd. extended a warm welcome to the IIF delegation and facilitated detailed plant tours, technical interactions, and experience-sharing sessions, making the visit highly enriching and professionally rewarding.

The IIF delegation was led by **Mr. Naresh Garg, Past President, IIF** and **Mr. Vinit Jain, Past President, IIF**, and comprised distinguished members including **Mr. Dinesh Gupta, Co-Chairman, IIF SAC**; **Mr. Anurag Singh Bhadauria, Hon. Treasurer, IIF Northern Region**; **Mr. Ram Prakash Garg, Ratan Engineering Pvt. Ltd.**; **Mr. Mahendra Vyas, MPM**; and **Mr. Sanjay K. Gupta, Managing Director, Global Axis**, along with several other respected members from the Delhi Chapter and Northern Region.

At both facilities, participants engaged in meaningful discussions with the host management teams on **production technologies, process optimisation, quality control, sustainability practices, and future expansion plans**. The interactive sessions encouraged the exchange of ideas and experiences and reinforced IIF's role as a dynamic platform for **professional development, technical advancement, and industry networking**.

The members expressed great appreciation for this initiative and shared very positive feedback about the quality and usefulness of the visits. Motivated by the success of the programme, the participants collectively proposed organising more such industrial work visits on a regular basis, with another visit **tentatively planned for February 2026**.

A special highlight of the visit was the on-the-spot registration of two new members for the IIF Delhi Chapter. This achievement truly served as the “icing on the cake” and added further value to the overall success of the programme.

The Institute of Indian Foundrymen – Northern Region and the IIF Delhi Chapter reaffirm their commitment to organising high-quality industrial and technical programmes that promote knowledge sharing, innovation, and collaboration, while contributing meaningfully to the growth and global competitiveness of the Indian foundry industry.
